

**ABSTRACT**

An ergonomic keyboard providing support for the palms and fingers of  
5 a user. The ergonomic keyboard comprises a plurality of surfaces of  
different elevations, the surface of highest elevation adapted to support  
the palms so that the thumbs are separated from the rest of the fingers  
that are positioned on a distal side of the ergonomic keyboard. At least  
one surface of the plurality of surfaces is located on the distal side and  
10 at least one surface of the plurality of surfaces is located on the side  
where the thumbs are positioned, at least one of the plurality of  
surfaces is provided with at least one key.
